

PERSONALIZED MEDICINE SERVICES

DNA Drug Sensitivity Testing

DNA Drug Sensitivity Testing helps healthcare providers select the safest, most effective medicine and dose for every patient. DNA Drug Sensitivity Test results are reported in the GeneMedRx software so healthcare providers can understand the combined effects of DNA test results, prescription drugs, over-the-counter medicines, herbal preparations, and other factors that affect treatment success.

Consider DNA Drug Sensitivity Testing When:

A patient is taking four or more prescription drugs, a patient or patient's family has a history of medication problems, or any of the following drugs or classes are being considered:

- Clopidogrel (*Plavix*)
- Warfarin (*Coumadin*)
- Tamoxifen (*Nolvadex*)
- Atomoxetine (*Strattera*)
- Pain Medications
- Antidepressants
- Heart Medications
- 5FU or Irinotecan

HOW IS TESTING ORDERED?

CALL 800.523.6487

Call us to order cheek swab collection supplies (no blood draw required), including prepaid FedEx return shipping. Testing is usually covered by insurance when submitted with the required physician prescription.

DNA PARENTAGE TESTS

Uncertainty about parentage has life-long psychological and financial consequences. We proudly accept the responsibility to resolve this uncertainty because we have the best people, experience, and facilities available. Since 1987, Genelex has been repeatedly recognized for our commitment to excellence. If you, or one of your clients or friends have questions about parentage testing, call (800) 523-6487 with confidence.

WE ARE TOP RATED BY CUSTOMERS, RATING AGENCIES, AND THE MEDIA

- More than 99% of Genelex customers respond positively to our regular follow-up surveys. Read what they have to say on our web site www.genelex.com.
- Oprah Winfrey, CNN, The New York Times, and many other media sources choose Genelex when looking for experts to explain DNA testing and comment on cases in the news.
- Rated in the 90th percentile or above by the Dun & Bradstreet® Past Performance Survey in cost, timeliness, customer support, overall reliability, and quality.

FREQUENTLY ASKED QUESTIONS

HOW DO I OBTAIN A DNA TEST?

Call a Genelex DNA testing consultant now. They will guide you through your test every step of the way. DNA samples are collected with a painless cheek swab in your home or at one of our worldwide collection centers. Tested individuals can be in different states or even different countries.

WHAT ARE THE TESTING OPTIONS?

Genelex offers accurate, confidential and prompt (overnight if necessary) DNA paternity testing tailored to fit your individual needs. We provide the broadest spectrum of testing options available anywhere, including self-collection tests for peace-of-mind or fully documented testing for legal purposes.

Pregnant Mothers

Coordinated with her physician from 8-20 weeks.

Motherless Testing

Father and child only, mother's sample not needed.

Siblings

Full, half or unrelated.

Extended Family

Testing to see if a person is a grandparent, aunt, cousin, or other relation.

Non-standard Samples

Items such as deceased samples, bones, or envelopes.

CAN THESE RESULTS BE USED IN COURT?

Yes, Genelex DNA testing results are accepted in courtrooms throughout the country and by embassies and the INS for immigration purposes.

WHAT ABOUT CONFIDENTIALITY?

Information of any kind regarding a case will not be released to anyone other than the people tested. We require written permission to release the information to representatives such as physicians or attorneys.

HOW DO I PAY FOR THE TEST?

Payment for testing can be made by credit card, cash, or money order. Payment plans are available, but results will not be released until full payment has been received.

ACCURACY

Genelex tests are 100x more discriminating than industry standards, meeting or exceeding state, federal and international legal requirements. Genelex surpasses stringent FBI criminal database testing standards by 20%.

EXPERIENCE

Genelex has been providing worldwide DNA testing since 1987. We have completed over 100,000 cases including one upheld by Supreme Court Review and another key to the settlement of the \$800M Larry Hillblom estate. We are constantly improving client options and upgrading technology to remain at the forefront of the industry.

RESULTS

Samples are sealed and tracked at every step, ensuring accurate results. In the laboratory, we analyze the DNA and provide cross-checked, verified, and notarized results in approximately five business days (1 or 3 day expedited testing available).

SERVICE

Genelex DNA Testing Consultants work side-by-side with you and our Laboratory Specialists to ensure that each case receives the utmost care and attention. Our staff's commitment to service earned a Dun & Bradstreet® rating of 94% in customer support and responsiveness.
